\$10 REWARD.

A reward of \$10 will be paid for information that will lead to the arrest and conviction of parties stealing The Bonanza from subscribers.

TO SUBSCRIBERS.

Parties who do not receive their papers, or who have any cause of complaint, will oblige The Bonanza by notifying this office.

All legal advertisements will be charged for at the rate of \$2.00 per square for the first insertion. There will be no exception to this rate. No affidavit of publication will be made until the advertisement is paid for.

No advertising cut one inch square or smaller will be accepted unless made of metal. No wood base cuts this size will be used. Wood cuts are dangerous to forms and press.

Entered at the postoffice in Tonopah as second-class matter.

COPPER AT GOLDFIELD.

THE discovery of copper ore in the Goldfield district running at the rate of nine per cent confirms every statement and prediction made concerning that camp since it first flashed into the limelight as the greatest producer of bonanza gold ore. It was asserted by geologists and metallurgists that the camp would bottom in the red metal and that the history of the conversion of Butte from a gold to a copper camp would be repeated. At this stage of the game it is too early to forecast such brilliant results but it is the devout wish of every man, be he either capitalist or employee, that the developments will not fall short of the predictions.

Goldfield is fortunate in having a strong vein of optimism but her mining engineers are manifesting great caution about going beyond the actual facts. They are dealing with the present and are chary about venturing into the realms of clairvoyance which do not concern them. That the Atlanta has opened a large body of ore wherein the values are carried in copper cannot be gainsaid at this time but it will require work and lots of it to disclose the potentialities of the situation. Speculators are prone to be carried away by the discovery of ore and fail to pay any regard to the cost and time involved in the development of a mine. Before a prospect can enter the shipping or producing list an immense amount of work has to be done in blocking out ore bodies and then determining the best means of marketing the ore so as to realize the fullest value of the contents.

The remoulding of Goldfield into a copper camp would entail an extensive and expensive campaign but one that would be fraught with the most vital consequences to all southern Nevada. The construction of a smelter would add greatly to the population and such an institution might lead to the development of the coal mines lying at our doors that have been grossly neglected by capital that hungered for precious metals, but the most significant outcome would be the advertising of this entire southern country. It must be admitted that the decline of the gold producers of Goldfield was a damaging blow to the mining industry of the entire State as it gave the impression that mines in an eruptive formation have at the best an ephemeral existence. The development of copper ledges in Goldfield would controvert this theory and force the investing world to realize that deep mining is as certain and as profitable as in the Lake Superior region. Tonopah capital has sunk deeper than in any other southern section and the values have not given any sign of impoverishing. If the same statement is certified about Goldfield circulation of the facts will help re-establish confidence and bring fresh capital to the State. Other camps will be imbued with life and vigor, mills will be erected, furnaces established and the hum of industry brought back to places where silence has brooded over fallen fortunes.

There never can be any rivalry between Tonopah and Goldfield except a rivalry that is governed by the highest principles of magnanimity such as athletic contests and an exchange of social amenities to knit both communities in ties of fraternal accord.

Irish soldiers and an Irish general saved the day at Waterloo. It was the Enniskillen Fusiliers who stood the brunt of fighting in South Africa and there will be no shortage of fighting material if England does not get cold feet over Home Rule. Lord Roberts, commanding general of troops in Great Britain and Ireland, is an Irishman in whose blood there is not the slightest tinge of saffron.

This is the birthday of Benito Juarez, the Mexican emancipator, whose life was wrapped up in the welfare of his country. The town that is named for him should be draped in mourning for the decadence of patriotism in the land he fought to redeem.

When the Sims bill passes every ship of state, no matter under what flag it may sail, must pay tolls when passing through the Panama canal.

Evidently those militant suffragettes who threw stones at Reginald McKenna's residence and smashed all the windows do not live in glass houses.

Wilson cannot sidestep that tolls deal if the senators from the Pacific States have any voice in the government. We might as well

turn the protection of our coast over to the British fleet and save the expense of a navy.

Now they are calling General Villa "The Man on the Hill." Why not call General Huerta "The Man Up a Stump?"

Will this never stop! The increased cost of living is shown by Lloyd's insurance raising the rate on appendicitis.

The woman who marries a man to reform him has her hands full at the start and her heart full at the finish.

President Wilson has been presented with a jar of apple butter by a friend in Missouri. It didn't jar him.

"General" Kelley's army needs a sanitary engineer corps much more than a military engineer corps.

Our ambassador to the court of St. James being a literary man might be called the funny Page.

The Duke of Manchester says he found Philadelphia too fast. Too fast asleep, most likely.

Intervention in Mexico is just as safe as intervention between two fighting rattlesnakes.

General Sherman said war is, but the I. W. W.'s say work is.

John Lind? John Lind? When have we heard that name?

Is the "watchful waiting" policy a rest cure?

INTERESTING SIDELIGHTS

Wonder if the Senate has the kind of a sense of humor the American believes the British have.—Little Arthur Echo.

President Wilson says that Uncle Sam can afford to wait. Here's hoping the Americans in Mexican can, too.—Detroit Free Press.

The president tells the country: "Come clean in the matter of Panama canal tolls and, almost literally, the 'world is ours.'—Atlanta Constitution.

Fighting shy of work and fighting those who want to work seems to be the favorite occupation of a lot of men in New York.—Birmingham, Ala., News.

Twenty-five aviators have fallen to death since the beginning of the year, but for every one that falls there are two to take his place.—Pittsburgh Post.

New York's road grafters seem to have done their dirty work in asphalt and bitumen. What's that old saw about touching pitch?—Kansas City Illuminator.

The poisoned needle epidemic seems to be subsiding. It is interesting to

NEW VEIN IS REVEALED IN THE MANHATTAN CONSOLIDATED MINE

On the Manhattan Consolidated property in Manhattan the main west crosscut on the 200-foot level recently revealed an entirely new vein, measuring eight feet in width. Three and a half feet of the vein constitutes a very good grade of ore spotted with future values. No drifting has thus far been done on the vein, its exploration being deferred until the completion of the main west crosscut, being run for prospecting purposes, to the end lines of the property in order to develop at depth the known ore bodies. If this ore shoot extends to the surface on its present dip it will give better than 300 feet of backs.

A strike of considerable importance was made on the Cornucopia property three miles southeast of Wall and Hess. According to reports, an excellent showing has been developed on the ground for a distance of several hundred feet. The average values obtained are \$5 in gold and \$2 in silver.

The Bath lease on the Manhattan Merger ground continues to show up well. Three raises are advancing on ore of good grade, proving its continuity for a distance of more than 70 feet. The ore body is being striped preparatory to breaking it down. The lessees have arranged for a

APPENDICITIS PREMIUM IS DOUBLED BY LLOYD'S

LONDON, March 20.—A group of Lloyd's underwriters some months ago fixed a premium of \$2.50 for policies of insurance against appendicitis, covering all claims for expenses up to \$500. There have been so many claims that it has been impossible to continue on those terms. A new syndicate has been formed, however, and the premium has been raised to \$5.

FAVORS PARIS-MUTUELS

Declaring that the pari-mutuel system of betting on horse races is generally favored by the people of the State and that the adoption of such a system is much desired for the good of the agricultural association which gives the annual State fair in Reno, the annual report of President R. W. Parry of the association to Governor Odell was made public today. Copies of the report have just been received and 500 of them were mailed out today.—Journal.

Telechronometer is the name that has been given a new device for measuring the time a telephone is in use.

Try This Tonic

BEEF

yields fibrin and albumen—the constituents of nerve and muscle. In our tonic we use the best beef extract to be had.

IRON

furnishes the blood with oxygen and keeps it rich and pure. We use iron in an easily assimilated form, one that is free from teeth corroding and constipating effects.

WINE

tones up the system and aids digestion. We use a rich, mellow wine that is sufficiently aged.

Physicians endorse and prescribe our Beef, Iron and Wine. A good remedy for spring debility.
